## Editorial

Hi there, Amigans.

Well, things are still happening on the **AMIGA** front, as you can see by the front cover. OS4 for "Classic" PPC Amiga's has finally arrived here and is looking very nice indeed. Maybe one of the lads who's already got it, will do a review for Workbench. And I see Amiga Inc. is still ploughing on with their plans for a universal AmigaOS that runs on everything, including the kitchen sink.

Maybe one day they'll succeed.

Que Sera, Sera?

Anyhow it's time for me to get this issue on it's way. So I'll see you later 'gator.

Ciao for now,  
Barry R. Woodfield.

### Last Months Meeting

January 20th 2008

Another good meeting. (See photo pages.)

### This Months Meeting

February 17th 2008

Come on along and be surprised.

### Next Months Meeting

March 16th 2008

### ADUG Memberships

The **Amiga Downunder User Group** offers you the chance to help bring Amiga back to the people.

By joining ADUG you help fund for show appearances like the upcoming Sydney CeBit show this year. It was through ADUG the 2001/2002 Comdex show appearances were funded. **Memberships can be paid at AUG meetings.**

# Bytes & Pieces

## Amiga Launches New Version of AmigaAnywhere

Amiga, Inc. is pleased to announce the availability of AmigaAnywhere™ version 2 to registered Amiga SDA developers. AmigaAnywhere 2 is the next step in the development of the new Amiga Operating System. AA2 content can run on a variety of different platforms, covering devices such as mobile phones, STBs, laptops, PCs and servers. The latest version of AmigaAnywhere facilitates media-rich content anytime, anywhere..

### WinUAE 1.4.6 released

WinUAE is able to emulate 68k Amiga models on your Windows PC. This version is the last one that runs on Windows 98/ME. The following versions will require Windows 2000 or newer.

Download from:

<http://www.winuae.net/>  
**Kernel 2.6.16.60 for the AmigaOne**

Geri reports in the forum that the kernel 2.6.16.60 is available for download at:

<http://amigaone-linux.sourceforge.net/>  
**FPSE - Free PlayStation Emulator**

LDChen and AmiDog are proud to present the latest version of FPSE - Free PlayStation Emulator. We hope you will have just as much fun playing with it as we have had working on it!

<http://www.amidog.com/>  
**7-Zip client for XAD/UnArc**

I have released a plug-in for XAD that allows decrunching of most 7-Zip (7z) archives through UnArc (there are some that won't be supported yet) This is a turbo-charged version, for both 68k and PPC AmigaOS with xadmaster v12+ If you downloaded the previous slow test version you can update to this one through:

<http://www.amiupdate.net/>  
[http://aminet.net/package/util/arc/xad\\_7z](http://aminet.net/package/util/arc/xad_7z)

**AmigaNetCenter Version1 update released**  
I just posted to OS4depot.org an archive that updates AmigaNetCenter alpha to AmigaNetCenter v1. The

## APC and TCP 2008

This year APC&TCP have plans for many Amiga projects. We would like to offer you a brief outline of our plans:

### **AmiATLAS**

Many people doubted there would be any further development but we want you to know that it is still intended to be released, but in small updates. You should be aware that it is one of the most complex projects for the Amiga. Thousands of files have to be accounted for, updated and maintained. Future versions will require AmigaOS4 and will use a brand new ReAction GUI. Furthermore there will be support for many new file formats making the transfer between different platforms easier.

### **Amiga Guru Book**

The German Amiga Guru Book has been available from us for some time. That's why many users asked us if we could make the English one available as well.

The English version is going to be completed later in 2008, but due to lack of time, it will be around the middle of the year when it is ready, but it will eventually be finished :-)

### **CygnusED**

Of course the development of CygnusED is also continuing. A new update is already in the pipeline but it will take some time to complete. We are also on the look-out for a competent developer for the MorphOS version!

### **DigiBoosterPro**

An additional developer has been working on DigiBoosterPro for some time now. This has made development much quicker than was at first anticipated. Currently we think that we can give you a detailed status report in 2-3 months. Maybe even sooner... and if everything goes smoothly, there will be a version of DigiBoosterPro for 68k, AmigaOS 4, MorphOS and even AROS !!!

### **Desert Racing**

Actually a version of Desert Racing for AmigaOS4 and MorphOS has been planned for some time. Unfortunately the developer responsible for the game is very busy at the moment. That's why we are currently looking for a new programmer. Desert Racing has been written in BlitzBasic. Anyone interested in assisting with this development is invited to contact us.

### **Flyin' High**

Currently we are working on an AmigaOS 4 version of Flyin' High. However it's not certain whether the port will ever be finished. We can only say that someone is working on it, but there is no promise that it will eventually be released. Many people have asked us if we were going to release a sequel to Flyin' High. The problem is we have no available developers to continue the work at a steady pace, and even less graphic artists. So sorry, at this point there is not likely to be a sequel to Flyin' High.

## MED Soundstudio

Here the development has been long and drawn out, mainly due to the lack of time and technical problems, but this year it should finally be completed.

## Amiga Future

With issue 70 the Amiga Future has reached 10 years old. That's a tremendous reason for us to celebrate. As well as the 6 issues of the print magazine intended for this year 2008, the Amiga Future homepage is going to be greatly enhanced and will contain lots of new features and content. In fact, we believe that the size of the Amiga Future homepage will double. We hope that the hits will rise like they have done over the past 12 months ;-)

## Is there any more news?

Currently we are in negotiations with people regarding various projects which we want to publish for the Amiga. New projects, mergers and acquisitions, ports and others, but nothing is set in stone at this point. However, you can be sure that there will be many new releases from APC&TCP in 2008!

## AmiKit 1.4.4 and new WinUAE add-on

The AmiKit turns your Windows (or Linux) machine into high-end Amiga environment. With AmiKit you can surf the web, read emails and documents, listen to or create your own music, burn CD/DVDs, edit images, play games and much more. AmiKit features a powerful file management solution: Directory Opus Magellan II....

We've done all the hard work for you. Once AmiKit is installed, all the basics are in place so that your system will be immediately usable. On a typical computer the installation should take you less than 10 minutes (check the requirements, please). **Free download** available at <http://www.amikit.amiga.sk/> Due to the fact that the default AmiKit installation contains WinUAE 1.4.4, the new WinUAE 1.4.6 Add-on for AmiKit is also available: <http://www.amikit.amiga.sk/add-ons.htm>

**AmiKit is also available on CD.**

## AFAOS 4.1

AFA manual+FAQ in amigaguide, English and German (thanks Thomas and Alexander)  
Faster redraw with windows that have width < 150 Pixel.

Picture datatype more compatible, cybershow, Photoalbum, YAM 2.6dev Portrait view  
dt alphatest, and RGBA Mode implemented.

Text in Menu in screentitle height center after reboot.

[http://amidevcpp.amiga-world.de/AfA\\_Binaries/AfA\\_OS\\_V4.1.lha](http://amidevcpp.amiga-world.de/AfA_Binaries/AfA_OS_V4.1.lha)

## Software News : Next generation AmigaSYS: uncut video trailer, beta pictures.

The implementation of the new plans into AmigaSYS was begun nearly two months ago. The first aspect is, as always, the interest of the users. The system has been changed in several places, a lot of unused functions were removed, but a lot of useful functions implemented instead of them (not programs).

### Read more...

All 3.9 theme will be removed and the v4 version of the Ken Lester DualPNG v3 icons from the old Virtual Dream will take the main role and a point in the new themes. The themes will support minimally 1024x768x32 and maximally 1680x1050x32 resolutions. The 3.0/3.1 uses these too, except to better performance on smaller machines, the 800x600x32 will selectable too.

There are people who doubt the abilities, speed, knowledge of AmigaSYS. So I will attach a trailer to the pictures. I think the pictures tell everything too, but a video is different after all. Instead of empty words, the facts will speak. You can see on the video, how the next AmigaSYS working. (3.1, 3.9, system, system speed, boot times, tools, utilities, music, graphics, games, demos etc...)

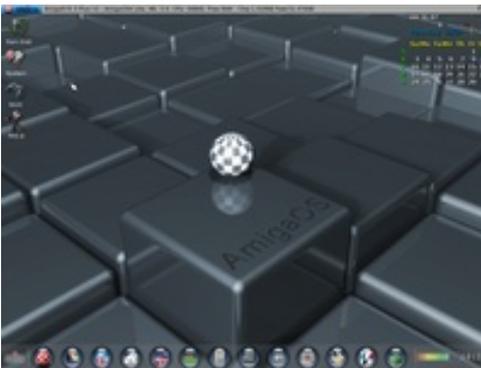

The feature list will be public with the release. Because I have a lot of plans, which are not public yet. The system is now beta and it isn't showing even the half of the full version's abilities! Release will happen soon, visit the official webpage frequently!

## **New ffmpegGUI v1.1 released - now supports padding and cropping.**

ffmpegGUI v1.1 has just been released on OS4Depot. Get it here:

<http://os4depot.net/index.php?function=showfile=&file=video/convert/ffmpeggui.lha>

**Significant changes include a new tap page for setting Crop, Pad and Pad color setting. A bug with the Start Offset was also corrected.**

### **ffmpegGUI is a GUI for the ffmpeg program.**

It supports some basic options via the GUI and allows the user to add additional options via a command line string gadget. This approach allows full use of ffmpeg's features directly from the GUI interface. Hopefully this approach make the interface attractive to both the novice and power user. It also allows for incremental development of the GUI.

#### **Changes for v1.1:**

Added tab for support of video cropping, padding and pad color commands.

Fixed start offset (-ss) command so it is correctly issued before the input file (-i) option.

Added checkbox to turn on and off gadget help. Off by default.

Adjusted "Output Format:" label spacing.

Modified VCD, SVCD, DVD, predefined setups to use 2 channel (stereo) audio by default.

Modified save and load settings to support the new commands.

Modified load settings to support proper loading of old settings files.

Moved predefined saved setups into a new directory under settings directory.

Added routine to capture ffmpeg output. Thanks to "Ami603" for generic function.

Added code to display formatted ffmpeg output in a list gadget displayed in a new tab.

(Not activated yet due to issues with ffmpeg's output.)

Added ability to identify if input file video is mpeg1 (mpeg1video).

Modified PAD gadgets to disallow setting which will cause ffmpeg to crash when video is mpeg1.

Added 'k' to video and audio bitrate values to make compatible with new and old versions of ffmpeg.

*Hallo, Amigans.*

## Kinds Of Sex

Results of a recent research shows that there are 7 kinds of sex.

### The 1st kind of sex is called: Smurf Sex.

\* This kind of sex happens when you first meet someone, and you both have sex until you are blue in the face.

### The 2nd kind of sex is called: Kitchen Sex.

\* This is when you have been with your partner for a short time, and you are so needy you will have sex anywhere, even in the kitchen.

### The 3rd kind of sex is called: Bedroom Sex.

\* This is when you have been with your partner for a long time. Your sex has gotten routine, and you usually have sex only in your bedroom.

### The 4th kind of sex is called: Hallway Sex

\* This is when you have been with your partner for too long. When you pass each other in the hallway you both say "screw you."

### The 5th kind of sex is called: Religious Sex.

\* Which means you get Nun in the morning, Nun in the afternoon and Nun at night.

(Very Popular)

### The 6th kind is called Courtroom Sex.

\* This is when you cannot stand your wife any more. She takes you to court and screws you in front of everyone.

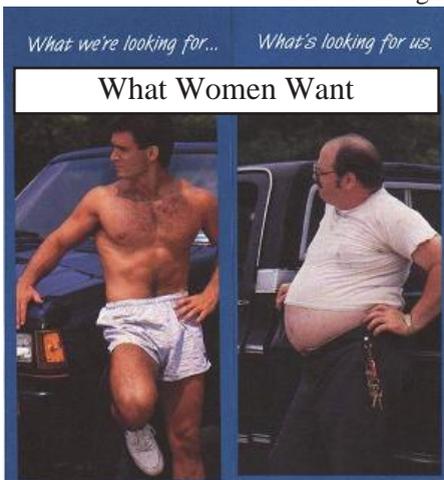

And, last, but not least:

### The 7th kind of sex is called: Social Security Sex.

\* You get a little each month. But not enough to enjoy yourself.

**PLEASE DO NOT INFORM ME WHAT STAGE YOU ARE IN.**

I have enough problems of my own.

## Official Visits

An African ambassador visited Russia and was entertained by his opposite number, the Russian ambassador. For three days, the African ambassador was wined, dined, and generally treated to the best hospitality that Russia had to offer.

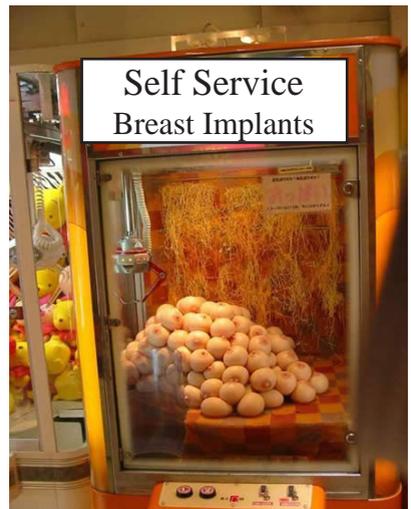

On the last day of his visit, the Russian ambassador said, "As your stay is coming to an end, it's time for you to play our traditional game, Russian roulette. One of the six chambers of this gun is loaded - you spin the cylinder, point the gun at your head, and pull the trigger."

This phased the African slightly, but he was a proud man of a warrior people, and to show fear would be unthinkable. Both men took their guns, spun, and pulled the triggers. Both chambers were empty, and both ambassadors breathed a sigh of relief. The African ambassador was impressed with the courageous game, and thought hard about the subject before the Russian Ambassador was due to visit his country the next year. When the visit came, the African ambassador treated the Russian with all hospitality, until the final day of his stay. Leading him to a private room in the palace, the African ambassador spoke, "Now, it is time for you to sample our game, African roulette". He then led the Russian into the room, the only occupants of which were six stunning and naked women.

The African ambassador said, "These women are the most beautiful ones of our tribes. Any one of them will give you oral sex, take your pick".

The Russian was not entirely averse to this idea, but he couldn't see the connection with Russian Roulette. He said, "Well, OK, great, but where's the roulette part? Where's the danger?"

With a big grin on his face, the African ambassador answered: "One of them's a cannibal."

## Fishing Experience

A couple went on vacation to a resort up north. The husband liked to fish, and the wife liked to read. One morning the husband came back from fishing after getting up really early that morning and took a nap. While he slept, the wife decided to take the boat out. She was not familiar with the lake, so she rowed out and anchored the boat, and started reading her book. Along comes the Game Warden in his boat, pulls up alongside the woman's boat and asks her what she's doing?

She says, "Reading my book." The Game Warden tells her she is in a restricted fishing area and she explains that she's not fishing. To which he replied, "But you have all this equipment. I will have to take you in and write you up!"

Angry that the warden was being so unreasonable, the lady told the warden, "If you do that, I will charge you with rape."

The warden, shocked by her statement, declared, "But I didn't even touch you."

To which the lady replied, "Yeah, but you have all the equipment!"

## Burglary

"Get this." said the English bloke to his mates, "Last night while I was down the pub with you guys, a burglar broke into my house.

"Did he get anything?" his mates asked. "Yeah, a broken jaw, six teeth knocked out, and a pair of crushed nuts. The wife thought it was me coming home drunk."

## Bragging: Love Making

A Frenchman and an Italian were seated next to an Australian on an overseas flight. After a few cocktails, the men began discussing their home lives.

"Last night I made love to my wife four times," the Frenchman bragged, "And this morning she made me delicious crepes and she told me how much she adored me."

"Ah, last night I made love to my wife six times," the Italian responded, "And this morning she made me a wonderful omelet and told me she could never love another man."

When the Australian remained silent, the Frenchman smugly asked, "And how many times did you make love to your wife last night?"

"Once," he replied.

"Only once?" the Italian arrogantly snorted. "And what did she say to you this morning?"

"Don't stop!"

## New Home

One evening a family brings their frail, elderly mother to a nursing home and leave her, hoping she will be well cared for. The next morning, the nurses bathe her, feed her a tasty breakfast, and set her in a chair at a window overlooking a lovely flower garden. She seems quite happy, but after a while slowly starts to lean over sideways in her chair.

Two attentive nurses immediately rush up to catch her and straighten her up. Again she seems OK, but soon starts to tilt to the other side. The nurses rush back and once more bring her back upright. This goes on all morning.

Later the family arrives to see how the old woman is adjusting to her new home. They ask, "So, Ma, how is it here? Are they treating you all right?"

"It's pretty nice," she replies. "Except they won't let you fart."

## The Soldier

The train was very crowded, so the soldier walked the length of the train, looking for an empty seat. The only unoccupied seat was directly adjacent to a well dressed middle aged lady and was being used by her little dog.

The war weary soldier asked, "Please, ma'am, may I sit in that seat?" The French woman looked down her nose at the soldier, sniffed and said, "You Americans. You are such a rude class of people. Can't you see my Little Fifi is using that seat?"

The soldier walked away, determined to find a place to rest, but after another trip down to the end of the train, found himself again facing the woman with the dog. Again he asked, "Please, lady. May I sit there? I'm very tired." The French woman wrinkled her nose and snorted, "You Americans! Not only are you rude, you are also arrogant. Imagine!"

The soldier didn't say anything else; he leaned over, picked up the little dog, tossed it out the window of the train and sat down in the empty seat. The woman shrieked and railed, and demanded that someone defend her and chastise the soldier.

An English gentleman sitting across the aisle spoke up, "You know, sir, you Americans do seem to have a penchant for doing the wrong thing. You eat holding the fork in the wrong hand. You drive your cars on the wrong side of the road. And now, sir, you've thrown the wrong bitch out the window."

### About The Group

The Amiga Users Group Inc. is a non-profit association of people interested in the Amiga family of computers and related topics. We do not support or condone software piracy. To contact us <http://www.aug.org.au>

### Membership

The AUG Inc. membership year runs from September to August. If you are joining in:

- August-September .....\$30
- October-November .....\$21
- December-January .....\$17
- February-March .....\$13
- April-May .....\$10

### Amiga Disk and Book Library

AUG has a collection of Amiga books, magazines and programs. Members can borrow for a period of one month. The library is available at most meetings.

### World Wide Web Access

The vast array of internet providers can make choosing a provider for yourself a difficult task. The AUG can help with advice and a helping hand with setting up your own internet access.

### Members Mailing List

The AUG moderates a members mail list at Yahoo Groups. Help, advice or anything Amiga related can be discussed. [http://yahooaugroups.com/group/Amiga\\_Users\\_Group\\_Vic](http://yahooaugroups.com/group/Amiga_Users_Group_Vic)

### The Dead Letter Department

The AUG's BBS run by Craig Hutchison has access to all the latest AmiNet files as well as other goodies. Registration is free to all members. Phone: (03) 9571 7194

### Meetings

The Amiga Users Group meets at the Wadham House Craft & Hobby Centre, 52 Wadham Parade, Mount Waverley (see map) on the 3rd Sunday of each month from 2:00pm to 6:00pm. There is ample parking at the rear. **Fee:** \$2.00. This is to cover some of the rental costs.

Mail to: Amiga User Group  
PO Box 2097 Seaford Vic 3198
